

OUR OFFICE

Our state-of-the-art practice has been conveniently located on the corner of Route 10 and Millbrook Avenue in Randolph, NJ since 1991. We are one of the very first pediatric practices to offer all digital x-rays. We maintain close relationships with area pediatric primary care practices and are proud to be the pediatric dental practice many doctors choose for their own children. Both typical and special needs children are equally at home in our child friendly environment, geared to make each visit a positive one for both patients and parents. As a result, we are consistently named a top dentist by New Jersey Monthly Magazine and NJ Family Magazine.

OUR STAFF

Our hygienists and staff have been with our practice for an average of 10+ years. Each member of our team is committed to treating both children and their parents with unparalleled care and concern.

COMMUNITY IMMERSION

Since our inception, our practice has been an active and integral part of the community. We feel a strong responsibility to be an engaged and affirmative member by sponsoring local community, school events and sports teams, participating in health and wellness fairs and holding our own events including our annual Ice Cream Social, Mom's Night Out, Free Mommy & Me classes in Baby Sign Language, Tummy Time, and Music to introduce new moms to our office as well as Mission Gratitude, a family fun event honoring members of fire, police and rescue departments, the military and service dogs.

OUR DOCTORS

Our team of skilled Pediatric Dentists is lead by our practice's founder, Dr. Aaron Mannella.

DR. AARON MANNELLA attended Fairleigh Dickenson University College of Dental Medicine, completed his general dentistry residency at Monmouth Medical Center, and received pediatric specialty training at Brookdale Hospital and Medical Center. He is a diplomat of the American Academy of Pediatric Dentistry, and ranks among the most highly respected dentists in his field. Dr. Mannella also oversees the pediatric dentistry department at Morristown Medical Center, teaching residents and donating time treating children in need. He also maintains memberships in many prestigious professional organizations, such as the American Dental Association, American Academy of Pediatric Dentistry, American Society of Dentistry for Children and Tri-County Dental Association.

In his personal life, Dr. Mannella is very active within the community and has received many awards and honors, including Headstart's Volunteer of the Year and New Jersey Monthly Magazine and NJ Family Magazine Top Dentist Award annually. In his free time Dr. Mannella enjoys playing golf and teaching snowboarding.

He is extraordinarily proud that his son Matthew is following in his footsteps and will be joining him in the office as a Pediatric Dentist at the completion of his training.

EARLY CHILDHOOD DENTAL EDUCATION

Through on-site visits to pre-schools, our hygienists present a finely-tuned Early Childhood Dental Education Program which engages hundreds of preschoolers each year. We pioneered this program to educate children through an engaging presentation that includes the importance of dental health, the right way to brush and floss and how proper nutrition is a vital component in taking care of teeth.

FREE EXAMS FOR CHILDREN UNDER AGE 2

Our commitment to starting children off on the right path to good dental health begins with the eruption of the very first baby teeth. We back up this pledge by offering free exams to all children under the age of 2. Our mission is to get kids excited to go to the dentist by making each experience positive through our warm and engaging approach.

IN-OFFICE SEDATION

For children needing extensive treatment we offer in-office sedation with state-of-the-art monitoring. This enables ease of treatment right in our comforting environment, reducing patient cost and eliminating the need for multiple treatment appointments.
